The seminar is suitable for students working towards the Cambridge First Certificate and also for those who want to make progress in English.

The aims of the seminar are:

- to practise both language productive (speaking and writing) and receptive skills (listening and reading) effectively,
- to familiarise you with different task types you will meet in the FCE exam,
- to read interesting texts with lots of exercises to get the most out of the new vocabulary, grammar and style found in them,
- to listen to authentic interviews with people from a range of different backgrounds,
- to encourage you to compare different points of view on a wide range of topical issues and guide you towards successful communication.

In the course of both years the continuous assessment (in written and oral forms) of all language skills is required.
